

**bi-pa** (Biological Products for Agriculture) is a young company specialized in the development and registration of innovative biological plant protection products. Bi-PA fills the gap between research and bringing to the market of micro-organisms, plant extracts etc. for crop protection in conventional and organic farming. Our offices are located in Londerzeel, Belgium. At this moment, Bi-PA is looking for a Registration and Development Engineer (m/f) to strengthen the team.

For our head office in Londerzeel we are looking for a

## Registration and Development Engineer (m/f)

### Job specification

In your role as Registration and Development Engineer, you will support the registration and development of our biocontrol products worldwide. You will search for information and screen available data on new ideas. You will prepare specific registration dossiers and follow-up with local partners. You will plan, initiate and follow-up studies with our products. You will prepare and review summaries and reports. You will set-up and manage the regulatory and development database. You will build a good relationship with our partners and prepare and organize periodic meetings with stakeholders.

### Profile

- You have a Master's degree in agriculture, bio-engineering, biology, microbiology, chemistry or equivalent discipline
- You have minimum two years of experience in a similar position
- You have a strong interest in crop cultivation and (biological) control of pests and diseases.
- You communicate well and have very good knowledge of English. Additional languages are a strong asset.
- You are well organized and have strong administrative and planning skills.
- You are flexible, adaptive and pragmatic.

### Offer

- A challenging position in a dynamic and international environment.
- Working in a small dynamic team, in an informal and stimulating atmosphere
- Frequent contacts with other departments and external partners.
- A competitive salary increased with several benefits in kind.
