

**bi-pa** is specialized in the development, registration and implementation of new and innovative biocontrol products for agriculture and horticulture.

For our head office in Londerzeel we are looking for a :

## Development Technician (m/f)

### Job specification

As Development Technician, you provide technical and scientific assistance for the Bi-PA Development department. You will get the opportunity to organize lab trials, optimize the products and evaluate each project. You will generate and perform tests to evaluate the performance of Bi-PA products and to screen new products or applications.

### Profile

- You have a bachelor's or master's degree in (micro)biology, biomedical sciences, biochemistry, agriculture...
- You have basic work experience in a laboratory environment and/or in agricultural R&D.
- You are fully proficient in English (spoken and written) and Dutch (spoken).
- You work well-organized and accurately.
- You are able to think "out of the box" and are creative in looking for solutions.
- You are able to work autonomously as well as in team.
- You are an analytical thinker.
- Knowledge of ARM and statistics is an asset.

### Offer

- A varied job in a dynamic, international environment.
- An enthusiastic team and informal, stimulating working atmosphere.
- Frequent contacts with other departments.
- A competitive compensation including attractive benefits.
